

## ABSTRACT

The present invention provides stable compounds prepared from boronic acid and lyophilized compounds thereof of the formula (1):

in which  $\text{Z}^1$  and  $\text{Z}^2$  are moieties derived from sugar. The invention also provides methods for preparing such compounds. Lyophilizing a mixture comprising a boronic acid compound and a moiety derived from sugar produces a stable composition that readily releases the boronic acid compound upon reconstitution in aqueous media.
